PROTIME 8

COMMERCIAL KITCHEN TIMER

The **PROTIME 8** is an eight product timer that has been designed to provide quality at a low cost. Programming all parameters: cooking times, stir times, and hold times is easily done from the front panel. There are two stir times per channel. Timing accuracy is maintained by use of a precision ceramic resonator.

The **PROTIME 8** has an anodized aluminum housing with gaskets between the chassis and cover to prevent flour and water from entering.

Mounting can be to a horizontal or vertical surface by using the mounting bracket that is provided.

Power is provided by a two or six foot power cord. Standard power is 120VAC, 15VA, but 208VAC and 240VAC are available upon request.

The **PROTIME 8** comes with a 24 month warranty.

FEATURES
